Led the projects of redesigning both [LEADTOOLS](#) and [MiPACS](#) websites.

Designed and built a Digital Marketing Dashboard to consolidate critical marketing metrics

Attended multiple in person events and successfully created or increased business relations

EXPERTISE

- Collaborative
- Adaptable & Versatile
- Proactive & Self-Sufficient
- Team Player
- Result Driven
- Willing to Improve & Learn

WORK HISTORY

Marketing Web Developer - Apryse (2024 - current)

I work in an Agile environment, focusing on maintaining, improving, and developing marketing websites. My role involves continuously optimizing and expanding web functionality, including redesigning sites like www.mipacs.com from the ground up. I develop and manage Sanity components to enable real-time content updates and collaborate closely with designers to bring their visual concepts to life. Additionally, I oversee IIS-hosted services, automate tasks, and implement SEO strategies using tools such as Google Tag Manager, Google Analytics, and BigQuery. I actively work with SQL Server Management Studio, Sanity's GROQ, and Google BigQuery to manage server data efficiently, ensuring optimal website performance, usability, and search visibility.

Web Developer - LEADTOOLS (2021 - 2024)

As part of a two-person team, I managed website development, maintenance, and improvements while ensuring seamless functionality across marketing platforms. I wrote and edited both technical and non-technical blog content, promoted the company at trade shows and events, and collaborated with designers to implement their designs to their needs. I developed and optimized database interactions using SQL Server Management Studio and Sanity's GROQ while managing IIS-hosted services and automating tasks with Task Scheduler. Additionally, I applied and refined SEO strategies with tools like Google Tag Manager, Google Analytics, AHREFS, and BigQuery to improve search visibility and site performance. My role required adaptability and quick thinking to diverse and difficult assigned tasks.

Please reach out if there are any questions or you wish to know more about what all I have done
